

CHAMELEON 8

A rugged multi-modal biometric tablet

A Rugged, All-In-One Biometric Tablet

Chameleon 8 is the only advanced, multi-modal biometric tablet in the world that runs on Windows.

MOSIP Compliant

Chameleon 8 is compliant with MOSIP for citizen registration. The Modular Open Source Identity Platform (MOSIP) helps governments and other organisations cost-effectively implement a digital, foundational identity system.

Chameleon 8

Configurations

The Chameleon range has all the features you need to register and verify individuals. It's rugged and easy to operate. The tablets are highly customisable. From one to four fingerprint capture and an optional passport scanner, many things are possible.

Accessories

Protective Case

A custom EVA protective case with handstrap, power adaptor and stylus.

MRZ Scanner

Integrated high-speed passport scanner. Scans eID and RFID content at once.

Battery Charger

A single battery charger with an LCD indicator for battery status. Lightweight and compact design.
