ABOUT LAXTON

Laxton delivers end-to-end solutions in the Election, Citizen Identity, and Security fields. Our bespoke solutions include self-designed equipment and software to register and verify citizens. The seamless integration of our devices and software ensures an excellent user experience for citizens and operators alike. By working listening to our clients' needs and challenges, we have built up a team of industry-leading experts to successfully implement and service our solutions, even in the harshest environments. As a result, Laxton has become a trusted global end-to-end provider of Election, Citizen Identity, and Security solutions.

SOLUTIONS PROCESS

True end-to-end solutions for Elections, Citizen Identity, and Security

OUR SOLUTIONS

Robust and cost-effective end-to-end solutions with unparalleled user experiences.

We deliver large-scale end-to-end solutions, including biometric registration and verification devices, our specific functional software platforms, and in-country services. We work closely with organisations like MOSIP and OSIA to align our solutions with industry standards and with organisations like UNDP, IOM, World Bank, and others to support global initiatives that unlock opportunities for the citizens of every country in the world.

CERTIFIED ELECTIONS

From initial planning to final wrap-up, we work closely with governments to organise successful elections.

- Election planning
- Voter registration
- Voter verification
- Voter management
- Results management

CITIZEN IDENTITY

We work with governments to build civil registry databases and offer solutions to register everyone, even in the most remote areas.

- ID management system
- Biometric enrollment
- Biometric verification
- Identity cards

NATIONAL SECURITY

We offer a range of solutions for border control, law enforcement and security.

- Secure document authentication
- Multi-modal verification
- Rugged biometric devices
- Law enforcement solutions
- Border management solutions

OUR PARTNERS

Laxton works with a global network of partners to provide our customers with local interaction. Laxton partners provide focused expertise, particularly in-country customer support, warranty and spares management, project management and training. By doing so, projects are delivered on time every time and within budget.
